

# Safe Crossing over I-5

◀ *Let's prioritize the movement of people, not just cars on this bridge between two communities.*

## HOW DO YOU GET ACROSS I-5 SAFELY?

There are **no viable alternatives** for walking and biking this bridge, so the goal is to make crossing Interstate 5 on NE 45th Street safe for pedestrians and bicyclists, especially as the last mile to/from the new U District light rail station, which was promised to voters in the 2015 Move Seattle Levy. *This project has:*

- *The support of the Wallingford and U District communities*
  - *Secured funding of \$500,000, allocated by Seattle City Council*
  - *500+ signatures and personal testimonials in support*
  - *The endorsement of elected officials, advisory and advocacy groups*
  - *An extensively researched and viable solution that does not impact vehicular throughput*
- ▶ Sign the petition to demand SDOT make this crossing safe for all.

*An example of a similar solution for safe crossing of an overpass for bikes and pedestrians.*
